## WE PROVIDES

### FIRE ALARM SYSTEM

It is very important and primary fire detection system which includes smoke detector, heat detector, break glass, sounders, modules etc. with Control Panel.

We are well experienced for design, supply, installation, maintenance & servicing of Addressable and Conventional types of Fire Alarm System of various brands all over the world according to national & international standards as per client requirements.

### EMERGENCY LIGHTING SYSTEM

Emergency Lights & Exit lights shows the path and exits of egress routes for faster evacuation during the fire incidents even the power supply does not exist

We offers installation, maintenance & servicing of Self Contained, Monitored & Central Battery types of Emergency & Exit Lighting Systems according to national & international standards as per client requirements.

### VOICE EVACUATION & PUBLIC ADDRESS SYSTEM

Automatic annunciator through the speakers for evacuation during the fire incidents and activation of fire system. Used for huge areas and high rise buildings as automatic alert system.

We assure high quality systems including installation, maintenance & servicing of Standalone & Combined Voice Evacuation & Public Address System according as per client requirements.

### FIRE EXTINGUISHERS

Fire extinguishers are very primary fire protection system which can be used easily by normal peoples during initial stage of a fire.

We are providing supply, maintenance, refilling & servicing of all kind of Fire Extinguishers by national & international standards as per client requirements.

### FIRE FIGHTING SYSTEMS

The firefighting system is secondary and final water based fire protection which is very important for all areas as per the rules and regulations it includes Fire Pump, Sprinklers, Fire Hose Reels, Landing Valves, Fire Hose, Nozzles, Fire Hydrants etc.

We are very highly experienced in design, Supply, installation, maintenance and servicing of all above mentioned systems and equipments as per national & international standards according to client's requirements.

### FIRE SUPPRESSION SYSTEM

The automatic fire suppressions systems are different types for the protection of different equipments such as Clean Agent (FM 200 System for Server Rooms, electronic equipments & Electrical Rooms - where water based protection is not recommended), Foam System (for Generator & oil based equipments), Water Spray & mist systems (for transformer Rooms) Inergen & Co2 System (for Electrical Rooms), Wet Chemical Systems for Kitchens etc.

We have huge experience in design, supply, installation, maintenance & servicing of such systems as per the standards and requirements.

## OUR MISSION

Our mission is to be a dynamic team, providing the highest quality construction services available and also to provide builder services that surpass our client's expectations. We will accomplish this through the selective use of responsible subcontractors, by hiring and retaining first class employees, and by approaching the building process with honesty and integrity.

## OUR VISION

We are united company, committed to becoming the contractor of choice, pursuing excellence through dedication, experience and disciplined employees with an ongoing passion to deliver quality, timely and profitable projects.
